RULES

Put in the space one group of the following missing letters:

oi, ai, ow, oa, sh, ch, or, ar, er, ur, ar, air, ear, th, ee, oo, igh, ng, qu, ure, y, j, v.

- Get or make a dice with 4 colour sides (green,pink, blue and orange) and one side with an 'x', there will be one side blank which we do not need to use.
-Each player uses some counters of one colour.
- Roll the dice. If you roll an 'x' on the dice you can remove another player's counter. Roll the colour dice and choose a square of that colour and guess the missing letter/group of letters then place your colour counter on that square
- The first person who has 4 in a row correct (2 players) or 3 in a row correct (2+ players) horizontal, vertical or diagonal, wins the game.
-You must guess the missing letter(s) correctly for it to be possible to cover the square with a counter.
